

CHeck my mercedes and
Find my mercedes both should be in GOLD color when hovered then the border should appear
The CTA box Needs adjustments for sure follow the reference image closely and adjust it accordingly

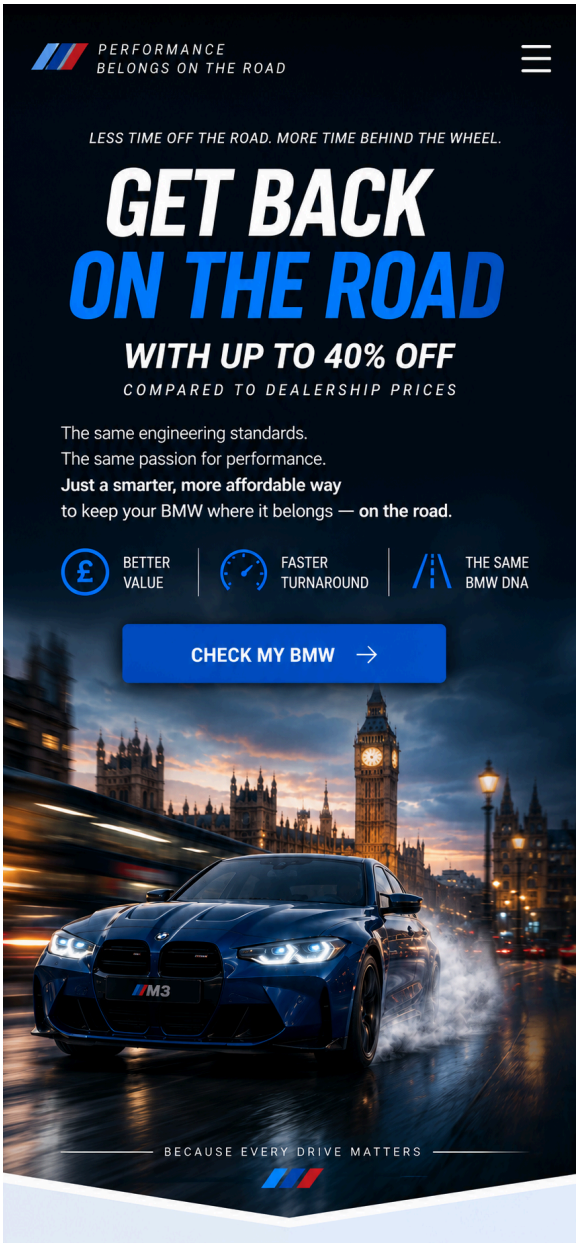

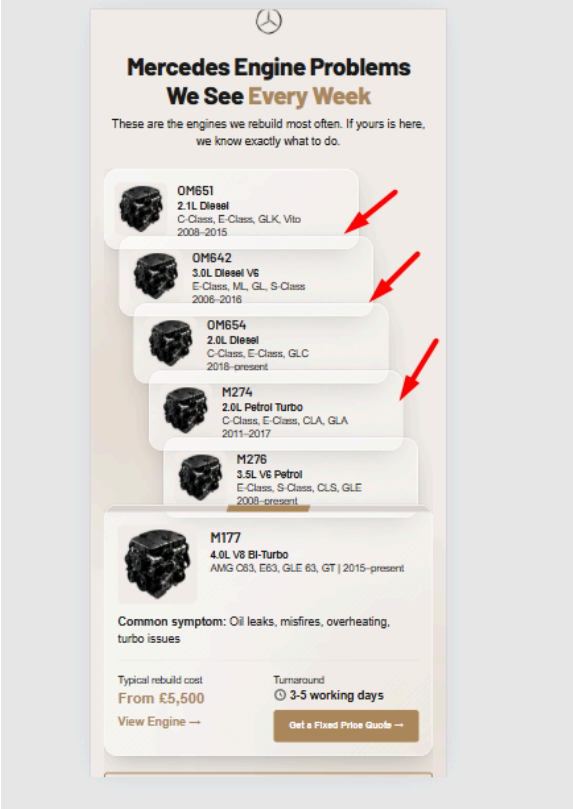

The text on problems is not visible because teh cloudy faded effect isnt applied properly on te boxes and space can be safed from left or right to give boxes a bit or squarish shape just like in reference image also the blue highlight in reference here it can be the gold one from the Theme of Mercedes

The font size is too small .. It should be center aligned
The triangular cut at the end of section is missing it should be smooth like in reference image not too sharp
The badges before the button needs to be aligned properly just like in reference image

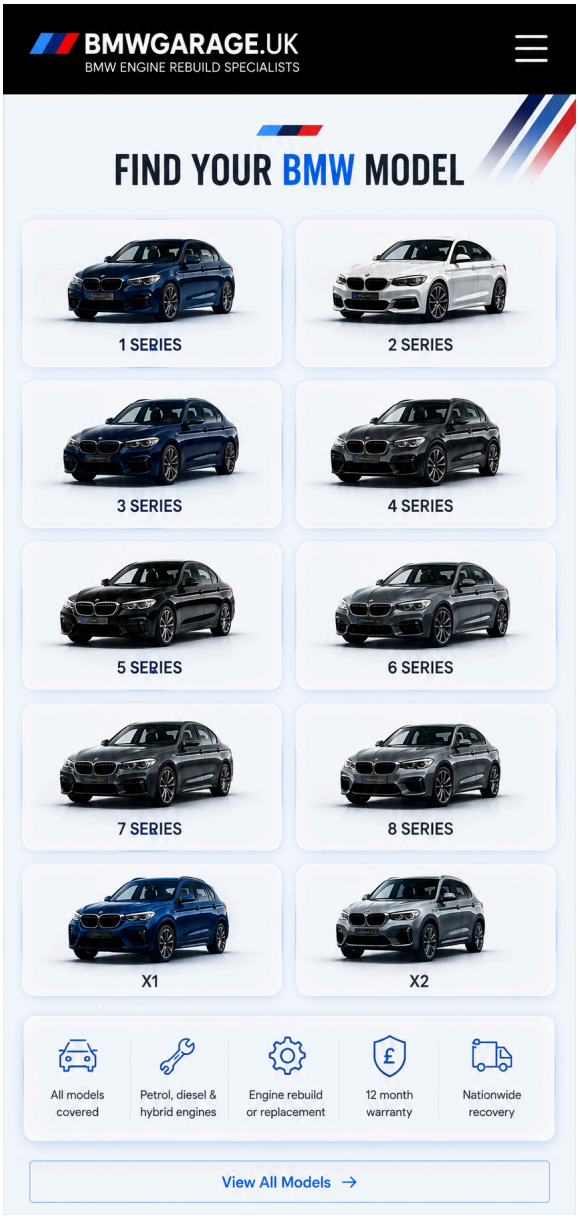

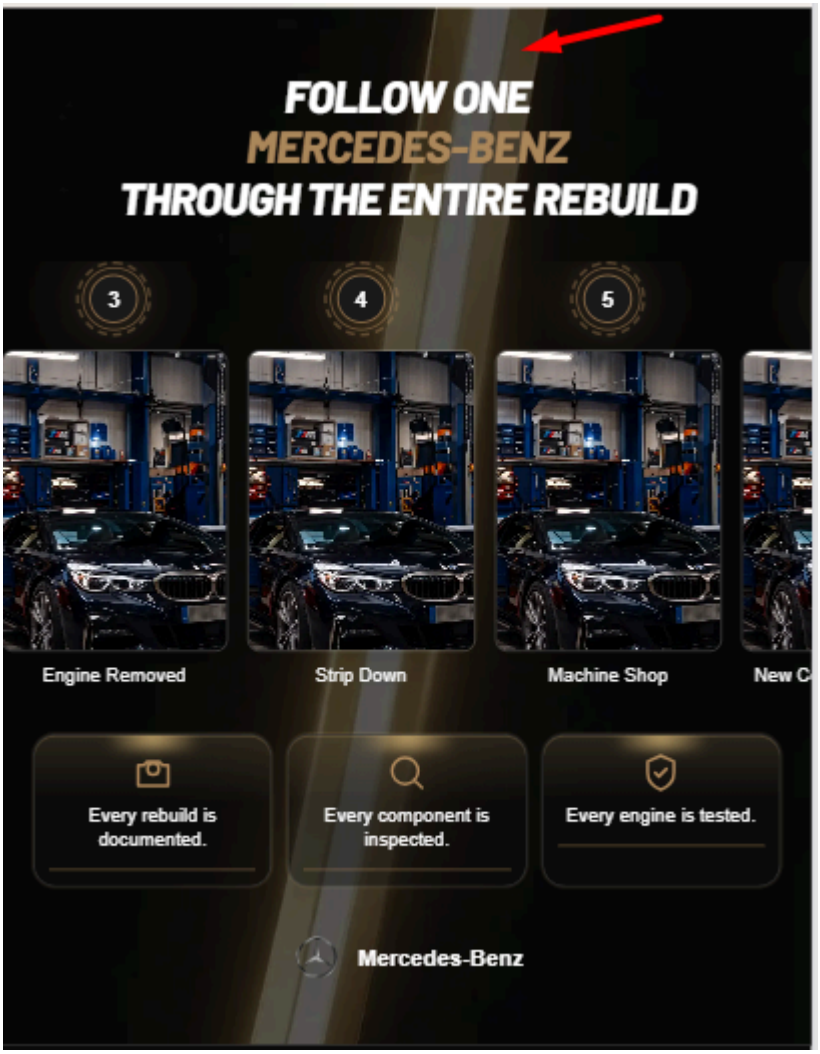

Cards should overlap properly at the moment the boxes borders are merged

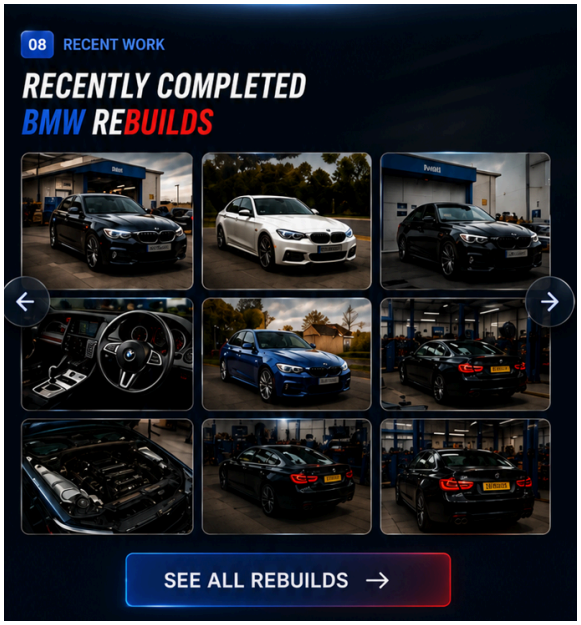

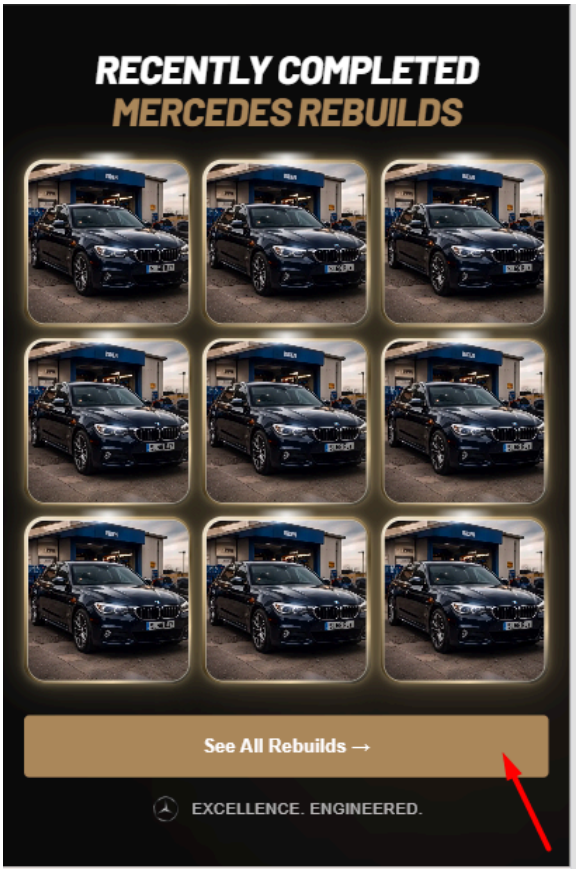

Badges should have a glass morphism effect behind them

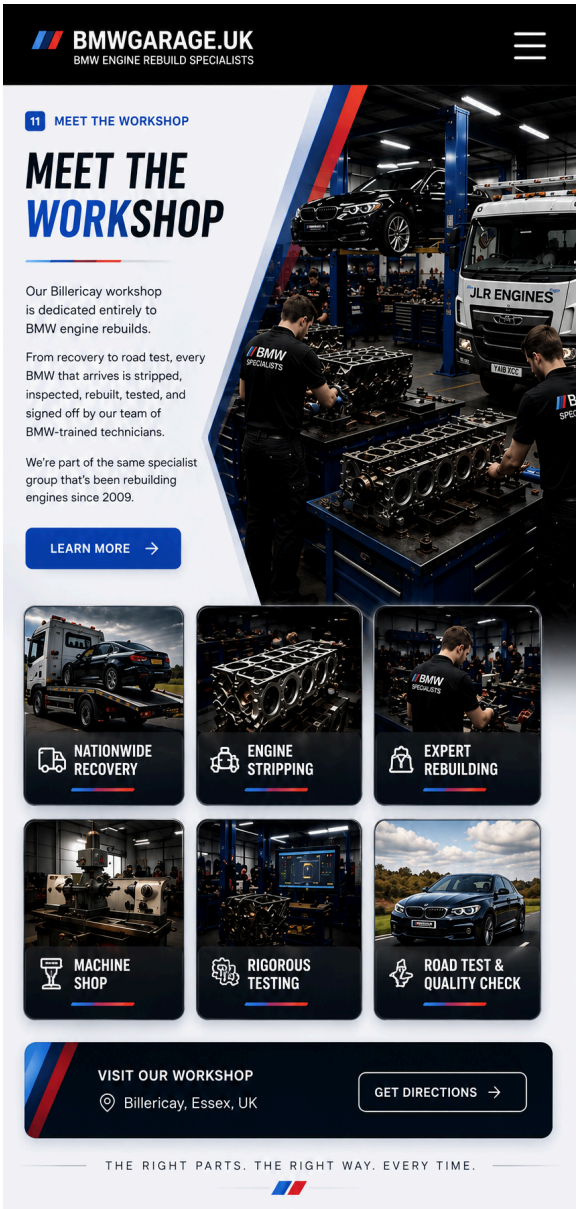

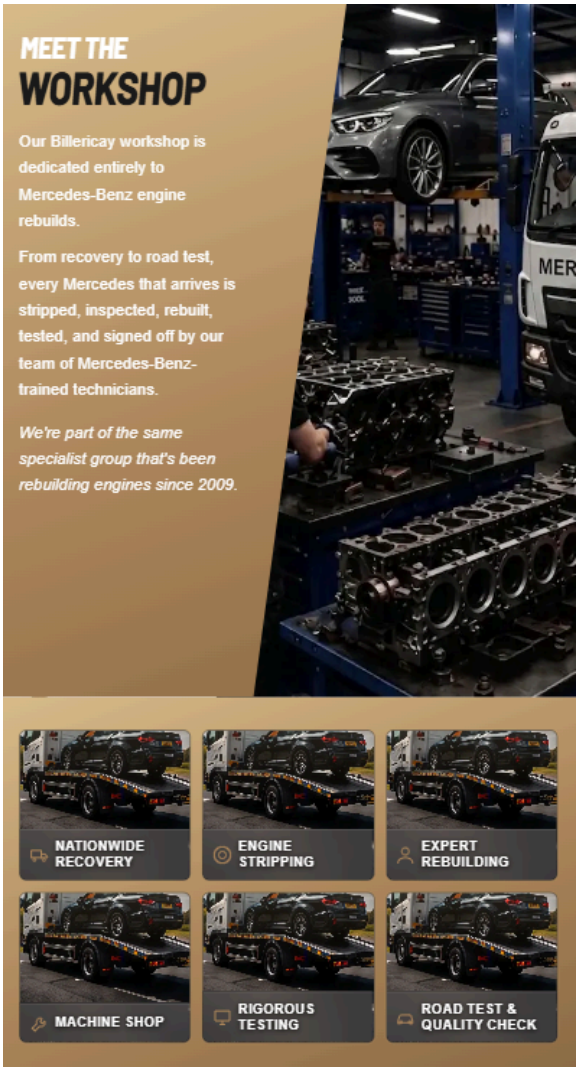

Remove the gold line behind the cards

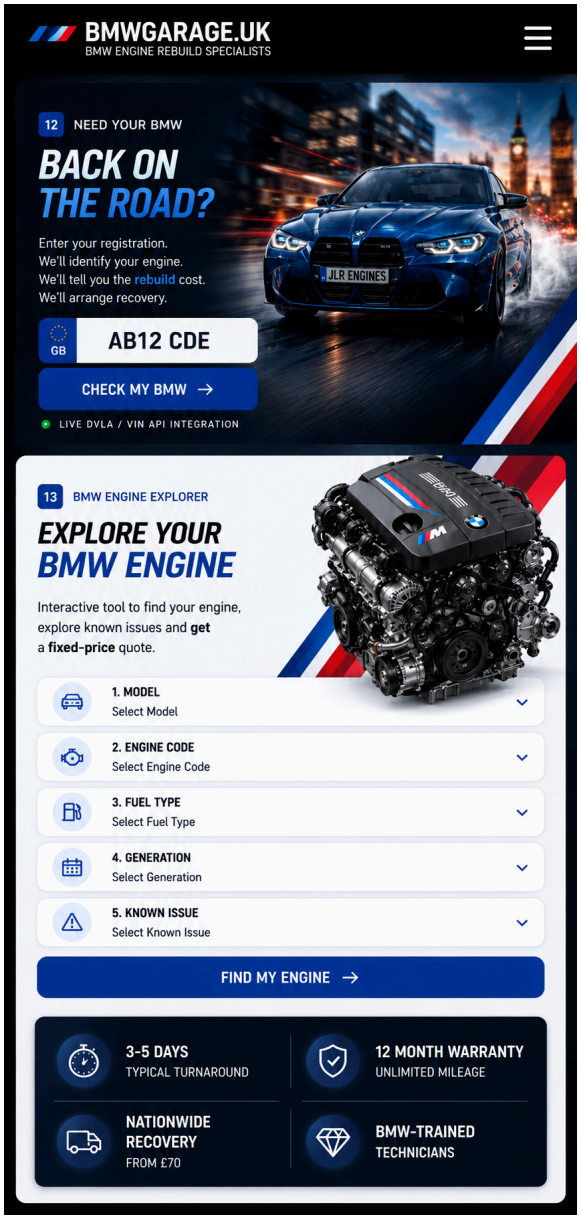

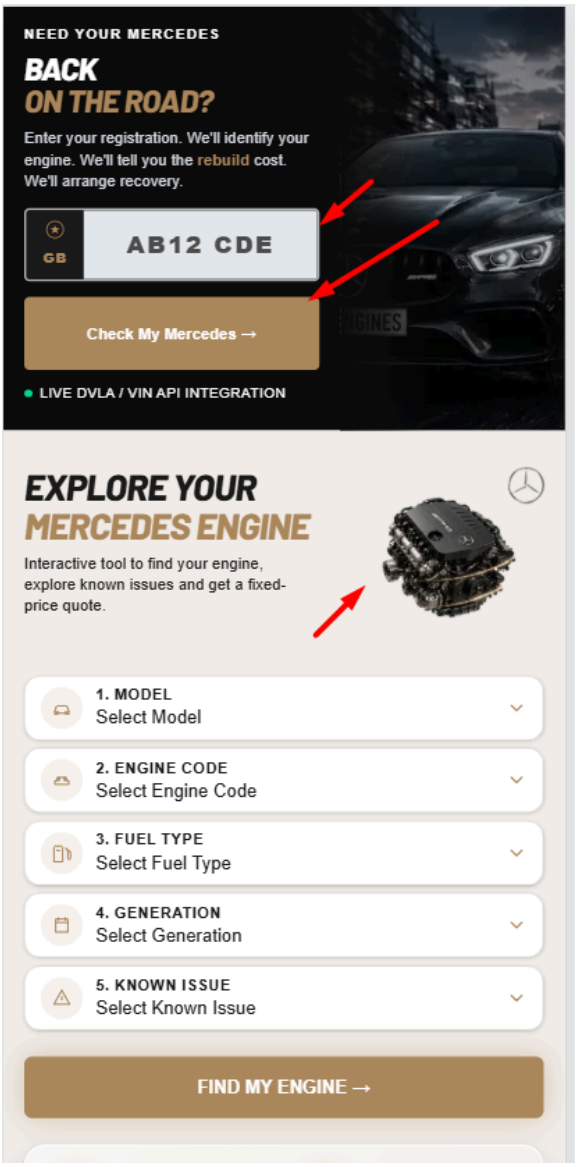

The button should have a gradient border just like the reference image use mercedes white and gold in combination there

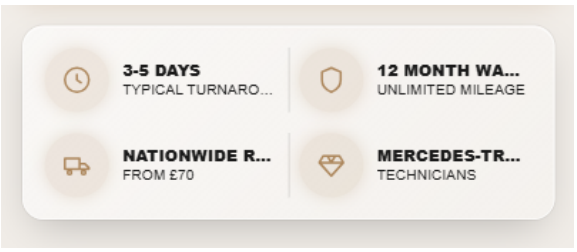

The bg should follow the light theme here instead of Gold as attached in ref
Also the text size is too small follow the mentioned typography in document and adjust image accordingly or the image should have a proper diagonal cut but assign less width ratio to image as compare to reference image it should 60% of text and 40 % of image on mobile
Then the cards of nationwide recovery, engine striping make them rectangular vertically and add the theme colors line after the card text as in ref image

The INpur reg box and teh button for check my mercedes their text sizes and paddings arent fine follow reference image and adust them

In the next section adjust the engine image size increase it

Badges should have a dark bg here according to the theme also apply glass morphism
